LB-0749 WHEEL MOUNT COMPOUND

APPROVED BY THE AMERICAN ASSOCIATION OF RAILROADS

This lubricant has been developed to replace White Lead based compounds for press fitting rail car wheels onto axels. LB-0749 will duplicate the performance of the lead based compounds without the hazards of lead exposure.

Approved by the A.A.R. in September of 1987, the LB-0749 Wheel Mount Compound is currently being used by nearly all the major railroads and independent wheel shops in the United States and Canada.

LB-0749 Wheel Mount Compound can be applied by brush, roller or spray equipment. Application of this compound is dependent upon your specific requirements.

PRODUCT DATA

CHEMICAL FAMILY: Linseed Oil w/ Additives

COLOR: Yellowish-White

VISCOSITY: Very Fluid

APPLICATION: Brush, Roll or Spray

ODOR: Mild

SOLUABILITY: Insoluble in Water

SEPARATION: Separation will occur during storage. **Mix frequently when using (Every 10-15 minutes)**

PACKAGING: 1-Gallon Cans (4 per case), 5-Gallon Pails

SHELF LIFE: 90-120 days

COMPOSITION: Raw Linseed Oil, Zinc Oxide & other compounds (Reference SDS for details)
